

Outline to Life of Paul, an Interactive Kids Bible Software

A special resource for installing and teaching with the software from Rotation.org

The Life of Paul software is being provided to the members of Rotation.org for their free use at church and at home by Educational Publishing Concepts. While older, it is still fun to teach with, but you'll want to make two tweaks to do so, read on! This outline is being provided as a courtesy by Sunday Software. Before teaching with the software, check to make sure the VIDEOS work in the Bible Time Theater. If the curtain just opens and closes without playing the video, you need to install Quicktime 2.1 from the downloaded software. Open the QT21 folder, RIGHT click the QT32 installer and select "Run as Admin," then run the installation. If Windows gives you a caution message, bypass it. The program is safe to install. If Quicktime asks to "check for other versions," select SKIP and continue. To make the program appear BIGGER on your screen, you will want to adjust your Windows Display Scale setting to 150% before you start the software. To do so, read the instructions <https://www.rotation.org/topic/important-technical-notes-and-helps>
